

HARI KRISHNA SALVER

Senior Software Engineer with 9.5 years of experience designing and scaling frontend-heavy platforms. Deep expertise in React, Redux and JavaScript, with proven impact in frontend architecture, performance, accessibility, and AI-powered product and developer tooling.

TECHNICAL SKILLS

Frontend & Mobile: JavaScript, TypeScript, React, React Native, Redux, Next.js, Micro-Frontends (Module Federation), GraphQL, Apollo Client, HTML, CSS/SCSS, Jest, React Testing Library

Backend: Node.js, Express, GraphQL (Apollo Server), Ruby on Rails, PHP, Laravel, Microservices

AI & Dev Productivity: OpenAI GPT API Integration, Cursor AI, CI/CD, GitHub Actions, Jenkins

Engineering Practices: Frontend System Design & Architecture, Performance Optimisation, Accessibility, Internationalisation (i18n, RTL/LTR), Test-Driven Development (TDD), Agile

Work Experience

Skillsoft

Hyderabad

Senior Software Engineer II

Aug 2022 - Present

- **Frontend Platform Architecture:** Architected and delivered scalable frontend features for the Percipio learning platform, serving millions of global users using React, Redux, and GraphQL.
- **Backend Development:** Built backend-for-frontend (BFF) services using Node.js, Apollo Server, and CRUD APIs to support frontend features.
- **AI Innovation:** Integrated OpenAI GPT APIs to deliver video and course summarisation features, improving content clarity by 30%.
- **AI Tools:** Leveraged Cursor AI to accelerate development, increasing productivity by 25%.
- **Automation & Code Quality:** Developed an automated AI code review system using GitHub Actions, streamlining the PR process and enforcing code quality standards.
- **CI/CD Optimisation:** Reduced Jenkins build times by ~25% (30m → 22m) through parallelisation. Migrating to GitHub Actions with Matrix Strategy, cutting unit test runtime by 50% (15m → 8m).
- **Web Security & CSP:** Implemented Content Security Policy (CSP) and frontend security best practices to reduce XSS and third-party script risks.
- **Media Platform Engineering:** Transformed learning experiences by building an in-house PercipioPlayer using Video.js and developing Book Reader 2.0 with enhanced navigation and accessibility.
- **Production Stability:** Active PER (Performance, Escalation, Resolution) triage team member, prioritising P1 issues, performing root cause analysis, and delivering rapid fixes to maintain 99.9% platform uptime.
- **Mentorship & Developer Enablement:** Guided and onboarded new developers, accelerating ramp-up through platform architecture and codebase knowledge sharing.
- **Awards & Recognition:** Multiple Spot Awards for resolving critical production issues; Sprint Achiever Awards for consistent delivery; Above & Beyond Award for technical leadership and team support.

Senior Software Engineer

Sep 2020 - Aug 2022

- **Frontend Development & Feature Scaling:** Developed the front-end for the Percipio learner platform, focusing on building and scaling core user-facing features.
- **Performance Optimisation:** Optimised page load and overall performance, resulting in measurable improvements to load times and user engagement metrics

- **Code Coverage:** Led code coverage initiatives, achieving 80% coverage using Jest and RTL.
- **Video Platform Engineering:** Enhanced JW Player and HTML5 implementations to improve the video viewing experience. Built a tracking system, reducing playback issues by 40%.
- **Accessibility Compliance:** Ensured accessibility across major features with keyboard navigation, screen reader support (NVDA, JAWS), and ARIA patterns to deliver an inclusive user experience.
- **Codebase Modernisation:** Modernised the codebase by migrating deprecated React features and upgrading test suites to ensure long-term stability.
- **Internationalisation (i18n):** Implemented multi-language and RTL/LTR support using react-intl for 15+ locales, providing a seamless global user experience.

Egnify Technologies

Hyderabad

Senior Product Engineer (Frontend & Mobile)

Apr 2019 - Aug 2020

- **Team Leadership & Delivery:** Led a team of 5 web and mobile developers, managing project timelines and ensuring timely, high-quality delivery.
- **Technical Architecture Design:** Designed scalable technical architecture for both web and mobile applications to support growth and long-term maintainability.
- **Modular Codebase & Reusability:** Modularised the codebase at project and feature levels, improving code reuse and accelerating development across the team.
- **Release Management & Deployment:** Managed end-to-end mobile application releases, including deployments and app store submissions.
- **Mentorship & Developer Enablement:** Mentored junior developers and interns, providing technical guidance, conducting code reviews, and fostering team growth.

Software Developer (Full Stack)

Aug 2017 - Mar 2019

- **Full-Stack Development:** Built an analytics and reporting platform for schools, automating the entire paper report generation process.
- **Code Refactoring & Optimisation:** Refactored the existing codebase using DRY principles, eliminating 40% of redundant code to improve maintainability and clarity.
- **End-to-End Feature Development:** Developed complete platform features, handling database logic, reporting workflows, and frontend UI implementation.

Tazzobikes

Hyderabad

Software Development Engineer

Jul 2016 - Jul 2017

- **Frontend Development & SEO Optimisation:** Handled front-end development and implemented SEO improvements, enhancing site performance and search visibility.
- **Internal Analytics Dashboard:** Built an internal analytics dashboard from scratch to track and visualize company operational data, enabling data-driven decision making.

Education

Bachelor of Technology in Computer Science
IIIT Basar

2016
